

# NetworX NX586E

## Direct Connect Instructions

**I. DESCRIPTION**  
 The NX586E can perform the same functions of the NX586E Direct Connect Plus, a number of additional features. It includes a built-in TCP/IP Network Adapter and a built-in USB port. It is designed to be used in a stand-alone system, and can be used in a network environment. The NX586E can also be used as a network interface card (NIC) for a PC. Direct Connect Plus can be installed on any model of the same type, or used by the NX586E software for installing, setting and in-line program.

**II. REQUIREMENTS**  
 • Windows 95/98/NT/2000/XP/2003/2008/2012/2016/2019/2022  
 • NX586E Direct Connect Plus  
 • Any Network Adapter card

Driving you back to where we started. Snappath is a service to store photos and videos online, where all of the effort of uploading and searching is done for you by the service. If you do not want to upload your files to a remote server, but just want to view them on your own computer then this is your solution. Key Features: Easy to use. Simply install and register your Snappath account on your PC. Then your photos will be displayed in a snap. Friendly web interface. One click brings your pictures to the site. A big picture window of your photos allows you to browse through. Ability to set privacy level. Only you can see the pictures you upload. Family, friends, and your computer are all set to private. Generates fast results. You can view your files as you upload them. With Snappath you never need to wait. Snappath is easy to use and free to use. If you are not sure how Snappath works, check out the tutorial below. What is Snappath? Snappath is an online photo and video storage and sharing service that allows you to store your pictures online. One nice feature is the ability to upload and download your pictures from a device, such as your PC. Unlike other services that do not allow you to store pictures on your device, Snappath allows you to upload and download from your device. The other nice feature is that Snappath runs on Windows and Mac and does not require a third party application. This allows you to save and upload your pictures to Snappath and from Snappath to your friends and family. 1. How to register? You can register for Snappath here. Your username, email address and password are all that you will need to register. You do not need to re-register at any time. 2. How to set my picture settings? The first thing you will want to do is set your picture privacy. Snappath has the ability to set your picture privacy to private, public or secret. Private will only allow you to see your pictures. Public will allow you to see your pictures but also allows other people to see your pictures. Secret will allow you to see your pictures, as well as allow you to share your pictures to others. To set the privacy level choose the privacy you want to see in the picture settings. 3. How to set my picture streaming? The next thing you 82157476af
